

Viney Chhillar

Professional Summary

Computer Science graduate and Software Engineer at LTMindtree with strong foundations in Java, MERN stack, and backend development. Hands-on experience in Android development (Java & Kotlin), Spring Boot, Firebase, and Python-based real-time applications. Proficient in MVVM architecture, Retrofit, RecyclerView, Room DB, and secure communication systems. Passionate about building scalable, secure applications and solving complex problems using efficient algorithms and modern technologies.

Experience Summary

- Completed training in Java and Android Development (Java & Kotlin) at LTM
- Internship experience as a Python Developer at Zaalima Development.
- Hands-on experience building Android applications using Firebase Firestore
- Practical exposure to backend development, debugging, and optimization.
- Strong understanding of Data Structures, DBMS, and Software Engineering.
- Experience in building real-time and secure applications.

Skills Summary

Domain	Web development, Android Development, Backend Development
Programming Languages	Java, Python, C++, SQL, HTML, CSS, JavaScript, React, PLSQL
Database	MySQL, MongoDB, Firebase Firestore
Operating System / Platforms	Windows 10, Android, Web
Tools / Frameworks / Libraries	React.js, Node.js, Express.js, MongoDB, WebRTC, Android Studio, Firebase
Other Tools	Git, GitHub, VS Code, LeetCode, HackerRank
Methodologies	SDLC, Agile

Professional Certifications / Trainings

1. LTM Training — Java and Android Development (Java & Kotlin)
2. The Complete Android S+ Java Developer – Udemy
3. Certified in SQL (Intermediate)
4. Full Stack Web Development – Udemy
5. Oracle Academy – Java Foundation
6. Oracle Academy – Database Programming with SQL
7. Oracle Academy – Database Foundation
8. AWS Academy Certificate
9. Flipkart GRID 6.0 – Software Development Track

Work Experience

Project 1

Project Name	Trainee Performance Tracker (Android App)	Team Size	5
Start Date	January 2026	End Date	March 2026
Project Description	Developed an Android application during LTM training to track and manage trainee performance. The application features a dual-login system—one portal for employees and managers to monitor trainee progress and performance metrics, and another for trainees to view their individual results and growth insights.		
Role & Contribution	1. Worked on Android application development for tracking and managing trainee performance. 2. Worked on Firebase Authentication for secure login and role-based access 3. Worked on Firebase Firestore for storing and managing trainee performance and application data. 4. Worked on developing trainee performance dashboards with result-tracking features.		
Technology & Tools	Java, Kotlin, Android Studio, Firebase Firestore, XML		

Project 2

Project Name	Python Development Internship	Team Size	1
Start Date	March 2025	End Date	June 2025
Organization Name	Zaalima Development		
Project Description	Worked on Python-based backend systems contributing to development and optimization of modules.		
Role & Contribution	1. Developed and optimized backend modules using Python. 2. Debugged and resolved performance-related issues. 3. Collaborated remotely with team members on feature implementation. 4. Followed version control, testing, and documentation practices.		
Technology & Tools	Python, Git, Backend Development		

Project 3

Project Name	TuneTalk – Music & Voice Communication Platform	Team Size	3
Start Date	Oct 2024	End Date	Feb 2025
Project Description	Developed a full-stack music streaming platform that combines on-demand audio playback with real-time voice communication. TuneTalk enables users to stream music seamlessly while engaging in live voice conversations, enhancing social interaction and collaborative listening experiences.		
Role & Contribution	1. Built full-stack application using MERN stack. 2. Integrated WebRTC for real-time voice communication. 3. Designed scalable backend for efficient data handling. 4. Improved user interaction with seamless media experience.		
Technology & Tools	React.js, Node.js, Express.js, MongoDB, WebRTC		

Project 4

Project Name	Encrypted Real-Time Chat Application	Team Size	1
Start Date	July 2024	End Date	Sep 2024
Project Description	Built a LAN-based encrypted chat application enabling secure offline communication.		
Role & Contribution	1. Developed real-time chat system using sockets. 2. Implemented RSA encryption for secure communication. 3. Ensured confidentiality and authentication of messages. 4. Built a multi-client communication flow with reliable message sending/receiving and basic error handling.		
Technology & Tools	Python, Socket Programming, RSA Cryptography		

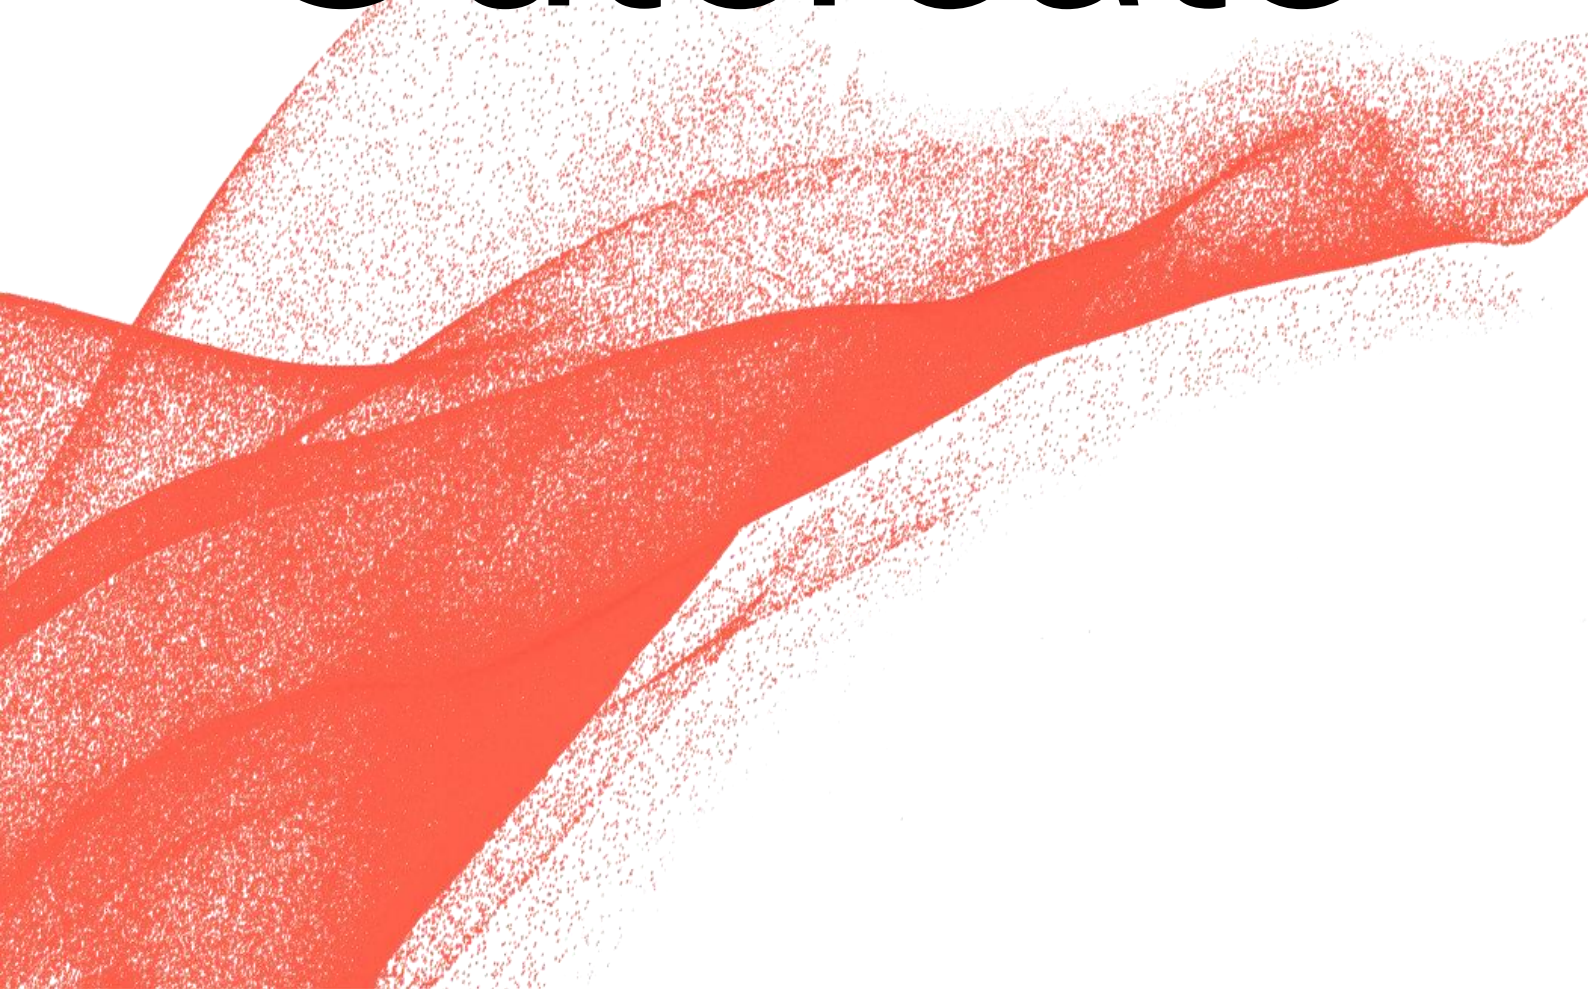

Educational Qualification

Education & Credentials	B. Tech in Computer Science and Engineering
	Sharda University, Greater Noida, 2021 – Jun 2025
	CGPA: 8.54
	Higher Secondary Education (Class XII)
	Central Board of Secondary Education (CBSE), New Delhi
	Army Public School, Dagshai, Himachal Pradesh
	Percentage: 87.4%
	Secondary School (Class X)
	Central Board of Secondary Education (CBSE), New Delhi
	Army Public School, Dagshai, Himachal Pradesh
	Percentage: 85.2%

It's time to Outcreate

An abstract graphic at the bottom of the page consisting of several overlapping, wavy, horizontal bands. The bands are filled with a dense pattern of small red dots, creating a textured, almost liquid-like effect. The colors range from a bright red to a lighter, almost white, suggesting a gradient or a sense of movement and depth.
